About Mid State Pools

Building Trust & Dreams Since 1958

Our Story

In 1958, a young army veteran named Jerry Friedman needed a way to provide for his family. He discovered the art of building pools with his son David, which evolved into pool renovations and installations of vinyl liners. Now, family owned and operated for three generations, led by Michael Friedman, Mid State Pools has been the most trusted inground pool liner replacement and new pool installation company for over 60 years with over 40,000 inground swimming pool liners installed and counting!

The recognition is great, but the most rewarding part of our business is developing long-lasting relationships with happy clients.

Contact & Location

Conveniently located at 323 Old Bridge Turnpike, East Brunswick, we're always available for consultation and free estimates. Or you can call 732.390.8080.

Why Choose Mid State Pools:

20 years A+ Rating with the Better Business Bureau

Dedicated representative & crew to your project from start to finish

Highly recommended Google reviews

The right way is our only way

Ability to Withstand NJ Environment	★★★★★ 5	★★★ 3	★★★★★ 5

ZAMTASTIC POOLS® SUPER ▲ STEEL®

Zamtastic Pools® and Super Steel® unite to bring you a better stronger pool!

*Superior corrosion resistance provided by ZAMTASTIC POOLS® metal coating technology.

*ZAMTASTIC POOLS® exhibit exceptional alkaline resistance even in direct contact with concrete and mortar. (like the concrete collar poured around your pool)

*Added strength with 3-rib panels

*Structural grade steel is used to create thicker and stronger panels

ZAMTASTIC POOLS® are coated with a layer of zinc, aluminum, and magnesium for maximum corrosion resistance.

3-Rib Paneling.
Increasing the ribs to 3 per 8-foot panel gives you 200% greater strength than conventional panels with only 1 rib per 8-foot section.

Patented Gusset Corner Process.
Using gusseted corners instead of ordinary crimping methods ensures greater strength in each panel by permanently binding the top and side flanges together.

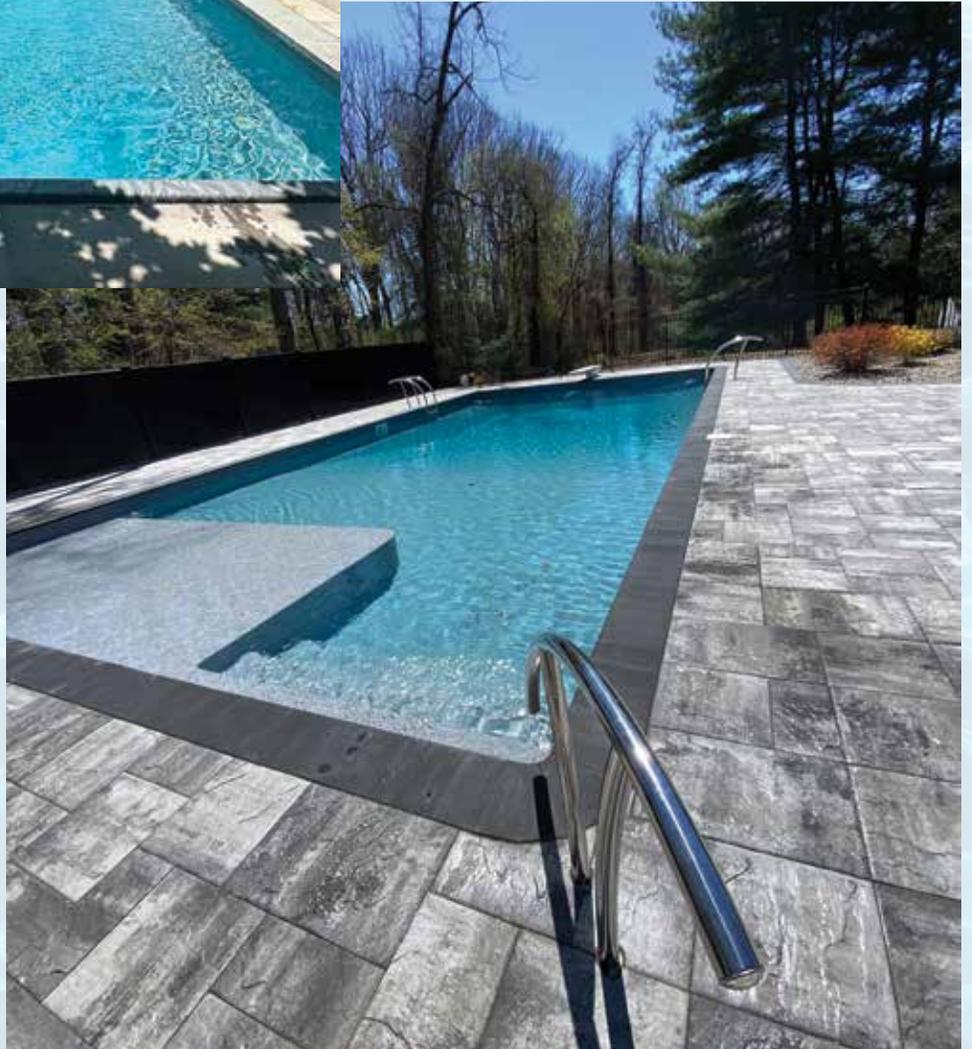

Ever Innovative International Swimming Pools was the 1st to Introduce the Pool Industry to ZAM® in 2013
